

SCHWEGMAN ■ LUNDBERG ■ WOESSNER

United States Patent Application

SUBSTITUTE REISSUE DECLARATION

As a below named inventor I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name;

I verily believe I am the original, first and joint inventor of the subject matter which is described and claimed in U.S. Patent No. 5,819,034 which was issued on October 6, 1998, and of the subject matter claimed in the broadening reissue patent application filed on even date herewith which reissue patent application corresponds to U.S. Patent No. 5,819,034, the specification of which is attached hereto.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by the amendment filed herewith.

I verily believe the original patent to be wholly or partly inoperative by reason that the original patent claims less than I had the right to claim in the patent. The claims fail to cover embodiments of the invention and inventions as claimed in the above-identified reissue application. Specifically, the original patent claims fail to include claim 10, reciting "a method of facilitating ordering an item using a distributed computing system including at least one client and at least one server, the method including receiving, via a data stream from the server, item data, the item data including information to at least one of show and describe the item via the client and an item identifier to identify the item as currently being offered for sale; presenting at least a portion of the item data to a user; receiving a control event associated with a single action effectuated by the user in response to the presenting of the at least a portion of the item data; responding to the single action by: retrieving personal information of the user from a permanent memory in the client, and combining the item data previously received via the data stream from the server with the personal information of the user previously stored in the permanent memory in the client to generate an order for the item, and transmitting the order for the item from the client."

The error arose without any deceptive intention on my part. The error arose during the drafting of the application and during subsequent amendments in connection with the prosecution of the application which resulted in the issuance of the original patent. The error occurred as a result of the attorney prosecuting the application and I failing to appreciate the scope of the invention and/or to properly identify the invention(s). The error was discovered subsequent to issuance of the original patent during a review of the original patent by the assignee and/or its representatives. I further acknowledge my duty to disclose information which is material to the examination of the application under 37 CFR §1.56.

Attorney Docket No.: 2050.001US3
Serial No. 09/672,523
Filing Date, September 27, 2000

Every error in the patent which was corrected in the present reissue application, and which is not covered by the prior oath(s) and/or declaration (s) submitted in this application, arose without any deceptive intention on the part of the applicant.

§ 1.56 Duty to disclose information material to patentability.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is canceled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is canceled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
- (2) It refutes, or is inconsistent with, a position the applicant takes in:
 - (i) Opposing an argument of unpatentability relied on by the Office, or
 - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

- (1) Each inventor named in the application;
- (2) Each attorney or agent who prepares or prosecutes the application; and
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.
